PROFESSIONAL EXPERIENCE

IVIVU - Front-end Developer

Jun 2025 – May 2026

Project: iVIVU Member — Customer & Booking Management System

- Migrated core membership application from Angular 8 → Angular 21, adopting standalone components, signals, and NgRx Component Store; eliminated legacy zone-based change detection overhead across 20+ feature modules
- Leveraged AI-assisted tooling (Claude, Copilot) daily for code generation, refactoring, and code review — cutting feature delivery cycle by 30%
- Translated Figma mockups into pixel-accurate Angular components with TailwindCSS v4, reducing design-to-code iteration time

IVIVU - Front-end Developer

Aug 2024 – Jun 2025

Project: iVIVU Hotel — ivivu.com (hotel booking platform, 30k+ monthly visitors)

- Spearheaded migration of decade-old server-rendered MVC hotel platform to Angular 19 with SSR + prerendering; improved dynamic page load time by 50% and static pages by 80%
- Architected NgRx store for multi-step booking flow (search → room selection → checkout) with full state persistence and rollback support
- Implemented lazy-loaded Angular feature modules and route-level code-splitting to minimise time-to-interactive for first-visit users

IVIVU - Front-end Developer

Feb 2024 – Jun 2024

Project: iVIVU Bespoke — ivivu.com/bespoke (KOL/KOC personalised travel pages)

- Architected a multi-layout, theme-configurable page-builder system enabling KOL/KOC creators to publish and monetise personalised travel itineraries
- Angular Universal SSR to generate crawlable HTML for all dynamic routes, increasing Google index coverage to 95% for SEO-critical pages
- Built shared component library (15+ reusable components) adopted across 3 sub-products, reducing per-feature development time
- Managed cross-feature application state via NgRx with typed selectors and effects for coordinated async API calls

IVIVU - Front-end Developer

Mar 2023 – Dec 2023

Project: iVIVU Xperience & Xperience ERP — ivivu.com/ve-vui-choi

Vietgoal Outsourcing – Front-end Team Lead

Jul 2023 – Jan 2024

Project: Vietgoal Erp & Vietgoal Client — vietgoal.com/, erp.vietgoal.com/

TECHNICAL SKILLS

Frameworks: Angular (v8–22 · SSR · NgRx · RxJS · Standalone/Signals), NgPrime, Ant Design, TaigaUI, Material UI, TailwindCSS, D3.js, Chart.js

DevOps & Tooling: Docker, GitHub Actions CI/CD, GitLab CI/CD Runner, Git (GitHub · GitLab)

AI-Assisted Dev: GitHub Copilot / Codex, Claude AI (Anthropic), Stitch, Antigravity — daily workflow integration

EDUCATION

FPT University Ho Chi Minh City

Bachelor of Software Engineering · GPA: 7.0 / 10

2018 – 2022
